(a) coded term

$$V_c = 0.4\sqrt{f'_c}\, b_w\, kd$$

sign +

exponent 1

domain $a/d \geq 2.5$

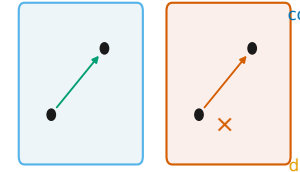

an omitted variable is a claim of no dependence

(b) scarce unit

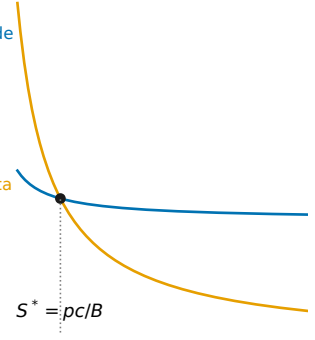

2,158 tests → 41–61 effective observations

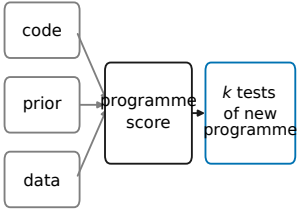

(c) within

(d) price

(e) update with new tests

13–32% lower error at $k = 3$
